

Fmoc-Lys(DabcyI)-OH Novabiochem(R)

Art. ID SAF-8520960005
Unit EA
Deliverydetails No Dangerous Good /not restricted

Description

"A modified lysine derivative for the preparation of chromogenically-labeled peptides by Fmoc chemistry. The DabcyI group quenches the fluorescence of EDANS, Mca, TET, JOE, FAM fluorophores, making it an extremely useful tool for the synthesis of fluorescence-quenched peptide substrates. The product number for this product was previously 04-12-1236. To obtain a certificate of analysis (CoA) of a lot that begins with the letter "A", please select the option in the right hand menu "Request a COA for Lot#s starting with A"."
