

H2A.X Phosphorylation Assay Kit (Chemiluminescence Detection)

Art. ID	SAF-17-327
Unit	EA
Deliverydetails	No Dangerous Good

Description

Phosphorylation of the histone variant H2A.X is a rapid and sensitive response to double strand DNA breaks. The H2A.X Phosphorylation Assay Kit (Chemiluminescence Detection) is a cell based assay formatted for microplate-based detection of levels of phosphorylated histone H2A.X.
