

Silver nanoparticles - Size distribution and concentration of silvernanoparticles calculated from small-angle X-ray scattering (SAXS)

Art. ID	BAM-N008
Unit	5 mL
Deliverydetails	No Dangerous Good /not restricted

Description

BAM-N008 is filled in amber narrow-mouth plastic bottles containing 5 ml of aqueous suspension of silver nanoparticles /// The intended purpose of BAM-N008 is the verification of analytical results obtained for determination of diameter, size distribution width, number density and mass concentration of nanoparticles in dispersion. Preferred use is quality control of particle size analysis with the SAXS method according to ISO 17867.
