

2-Amino-2-deoxy-D-erythronic Acid

Art. ID TRC-A168155-500MG

Unit 500 mg

Description

Category: Amino Acids and Derivatives, Chiral Reagents, /// Application Notes: 2-Amino-2-deoxy-D-erythronic Acid is an metabolite of L-threonine (T405500), an essential amino acid for human development, last of the common amino acids to be discovered. Identified in oat protein. /// References: Niemann, C., et al.: J. Biol. Chem., 143, 191 (1942)| Okawa, K., et al.: Bull. Chem. Soc. Jap., 42, 2720 (1969)|
