

## **Trelagliptin Trifluoroacetic Acid Salt**

Art. ID TRC-A627960-100MG  
Unit 100 mg

### Description

Category: Amines, Aromatics, Heterocycles, Pharmaceuticals, Intermediates and Fine Chemicals /// Application Notes:

2-[[6-[(3R)-3-Amino-1-piperidiny]-3,4-dihydro-3-methyl-2,4-dioxo-1(2H)-pyrimidinyl]methyl]-4-fluorobenzonitrile trifluoroacetic acid salt is a potent, selective, and noncovalent inhibitor of dipeptidyl peptidase IV (DPP-4). This inhibitor provides sustained reduction of plasma DPP-4 activity and lowering of blood glucose in animal models of diabetes. /// References: Augeri, D., et al.: J. Med.
