

2-Aminothiophene Hydrochloride

Art. ID TRC-A630443-2.5G
Unit 2.5 g

Description

Application Notes: 2-Aminothiophene Hydrochloride is a synthetic building block used in organic synthesis. It can be prepared by electrophilic amination of Grignard reagents with imidazolidinone sulfonyloxime. /// References: Kitamura, M., et al.: Bull. Chem. Soc. Jpn., 76, 1063 (2003)
