

Anagliptin-d6

Art. ID TRC-A637212-25MG
Unit 25 mg

Description

Category: Isotope Labelled Compounds, Amines, Aromatics, Heterocycles, Inhibitors, Pharmaceuticals, Intermediates and Fine Chemicals /// Application Notes: Anagliptin-d6 is the isotope labelled analog of Anagliptin. Anagliptin is a dipeptidyl peptidase-4 (DPP-4) inhibitor that suppresses proliferation of vascular smooth muscles and monocyte inflammatory reaction. It also attenuates atherosclerosis in male apolipoprotein E-deficient mice. /// References: Ervinna, N., et al.: Endocrinology, 154, 1260 (2013)| Furuta, S., et al.: Eur. J. Drug Metab.
