

4-O-Acetyl-N-acetylneuraminic Acid

Art. ID TRC-A167953-50MG
Unit 50 mg

Description

Application Note: 4-O-Acetyl-N-acetylneuraminic Acid was used to study the inhibition of influenza virus infection in guinea pigs. However, it does not appear to be a potent inhibitor since it is resistant to cleavage by viral sialidase, it may serve to protect the inhibitor from inactivation.
