

(+)-cis,trans-Absciscic Acid-L-tyrosine

Art. ID	TRC-A110095-25MG
Unit	25 mg
Deliverydetails	to be checked

Description

Application Note: (+)-cis,trans-Absciscic Acid-L-tyrosine can be used in biological study for preparation and biological activity of amino acid conjugates of absciscic acid. Different sets of ABA-amino acids induced ABA-like responses in different plants. Different plants can also have hydrolyzing activity toward different ABA-amino acids and an ABA-amino acid may function as a species-selective pro-hormone of ABA.
