

4-Amino-2-methylphenylboronic Acid

Art. ID TRC-A627995-500MG
Unit 500 mg

Description

Application Notes: 4-Amino-2-methylphenylboronic Acid is an intermediate used to prepare indole derivatives having combined 5HT1A, 5HT1B, and 5HT1D receptor antagonist activity. It is also an impurity of Tavaborole (T009760), a topical treatment of toenail onychomycosis. // References: Gaster, L., et al.: PCT Int. Appl.
