

Anhydrodemethyltetracycline

Art. ID TRC-A648055-25MG
Unit 25 mg
Deliverydetails to be checked

Description

Application Note: Anhydrodemethyltetracycline is an impurity of Demeclocycline (D230725), an antibiotic related to tetracycline and produced by streptomyces aureofaciens. Because it is excreted more slowly than tetracycline, it maintains effective blood levels for longer periods of time.
