

N-Azidoacetylglucosamine, Acetylated

Art. ID TRC-A818500-100MG
Unit 100 mg

Description

Category: Carbohydrates and Derivatives /// Application Notes: N-Azidoacetylglucosamine is a metabolic glycoprotein labeling reagent that is introduced metabolically in model organisms. The reactive azide group in N-Azidoacetylglucosamine will react with phosphines for visualization or selective capture. /// References: Vocadlo, D.J., et al.: Proc. Natl. Acad. Sci. U.S.A., 100, 9116 (2003)|
