

## **4-(2-Aminoethyl)triethylenetetramine**

Art. ID TRC-A622698-50MG  
Unit 50 mg

### Description

Application Note: 4-(2-Aminoethyl)triethylenetetramine was used to prepare crystal and molecular structure of racemic (4-(2-aminoethyl)-1,4,7,10-tetraazadecane)azidocobalt(III) nitrate hydrate. It is also used for analysis of oligoethylene oligoamines.

| Text/Information | Analyte/Parameter                    | CAS number   | Concentration/Value | Unit | Method | Source |
|------------------|--------------------------------------|--------------|---------------------|------|--------|--------|
|                  | 4-(2-Aminoethyl)triethylenetetramine | [31295-46-2] |                     |      |        |        |
