

2-Acetamido-2-deoxy-D-glucuronic Acid

Art. ID TRC-A158270-25MG
Unit 25 mg

Description

Category: Amines, Carbohydrates and Derivatives, Heterocycles, Pharmaceuticals, Intermediates and Fine Chemicals /// Application Notes: 2-Acetamido-2-deoxy-D-glucuronic Acid is used as a reagent in the synthesis of N-acetyl-D-glucosaminuronic acid-based sialylmimetics which can be used as potential sialidase inhibitors. /// References: Mann, M.C., et al.: Bioorg. Med. Chem. Lett., 14, 5555 (2004)
