

2-Acetamidopyridine-5-boronic Acid Pinacol Ester HCl

Art. ID TRC-A161165-10G
Unit 10 g

Description

Application Notes: 2-Acetamidopyridine-5-boronic Acid Pinacol Ester Hydrochloride is a reagent used to synthesize new quinolinequinone derivatives as cytotoxic agents. In addition, novel benzoxazinyl-oxazolidinones are synthesized using this compound with application towards antibacterial agents. /// References: Xin, Q. et al.: J. Med.
