

Amthamine

Art. ID TRC-A575955-100MG
Unit 100 mg

Description

Application Notes: Amthamine is a selective histamine H2-receptor agonist. It can be used to study gastric acid secretion. Amthamine also suppresses the release of serotonin. /// References: Coruzzi, G., et al.: Naunyn Schmiedebergs Arch Pharmacol. 348, 77 (1993)| Threlfell, S., et al.: J Neurochem. 107, 745 (2008)
