

Arclofenin

Art. ID TRC-A766585-1G
Unit 1 g

Description

Application Notes: Arclofenin is derived from Nitrilotriacetic Acid (N490175), which is a chelating agent which forms coordination compound with metal ions. Nitrilotriacetic acid is used in complexometric titrations and as well as for protein isolation and purification in the His-tag method. /// References: Smolinska, B., et al: J. Chem. Tech.
