

(+)-Avarone

Art. ID TRC-A794683-50MG
Unit 50 mg

Description

Application Notes: Avarone is a cystostatic agent which displays antibacterial and antifungal activities. Also, it is derived from 2-Methoxybenzenemethanol (M260760), which is used in the synthesis of antimycobacterial and antibacterial derivatives. Also used in the synthesis of phthalazines and analogues as benzodiazepine receptors ligands with specific activity. // References: Wei, Z. et al.: *Molecules.*, 18, 3872 (2013)| Carling, R. et al.: *J. Med. Chem.*, 47, 1807 (2004)|
