

Acesulfame Potassium-13C4

Art. ID TRC-A132503-25MG
Unit 25 mg

Description

Application Note: Acesulfame Potassium-13C4 is a labelled analogue of Acesulfame Potassium (A132500), a heat-stable sweetener that has not been suspected to cause cancer nor be genotoxic. Allelic variation of the Tas1r3 gene affects behavioral taste responses to this molecule, suggesting that it is a T1R3 receptor ligand.
