

3-Acetoxy-2-oxopropanol Dimer

Art. ID TRC-A167630-2.5G
Unit 2.5 g

Description

Category: Heterocycles, Metabolites and Impurities, Miscellaneous Reagents /// Application Notes:
3-Acetoxy-2-oxopropanol Dimer is the dimer of 3-acetoxy-2-oxopropanol and a derivative of 1,3-Dihydroxyacetone Dimer (D450075), a compound used in the synthesis of dihydropyrimidine calcium channel blockers.
1,3-Dihydroxyacetone Dimer is also used in the preparation of new antineoplastic and antifilarial agents. ///
