

## **beta-Amino-gamma,gamma-difluoro-benzenepropanol-d5**

Art. ID TRC-A604792-100MG  
Unit 100 mg

### Description

Category: Aromatics, Pharmaceuticals, Intermediates and Fine Chemicals, Isotope Labelled Compounds ///  
Application Notes: beta-Amino-gamma,gamma-difluoro-benzenepropanol-d5 is the isotope labelled analog of beta-Amino-gamma,gamma-difluoro-benzenepropanol. beta-Amino-gamma,gamma-difluoro-benzenepropanol is synthesized from cinnamyl alcohol (C442110). Cinnamyl alcohol is used as a fragrance ingredient and is a known cause of allergic dermatitis in humans. Cinnamyl alcohol is also part of a group of cinnamic acid derivatives (for example: 4-Methoxycinnamic acid -M262150) that might be useful for the treatment of diabetes and obesity. ///
