

## **N6-(2-Aminoethyl)-FAD**

Art. ID TRC-A609005-10MG  
Unit 10 mg

### Description

Category: Aromatics, Heterocycles, Nucleotides, Bases and Related Reagents, Phosphorylating and Phosphitylating Agents /// Application Notes: N6-(2-Aminoethyl)-FAD, is the product of the addition of amino group to the adenine nucleus of FDA, which is useful for attachment of ligands, and also for the studies on any functionalization of the FDA molecule in which the redox activity is to be maintained. /// References: Buckmann, A., et al.: Meth. Enzymology, 280, 360 (1997)|
