

4-Aminomethyl-2-methylpyridine

Art. ID TRC-A617205-2.5G
Unit 2.5 g

Description

Category: Aromatics, Heterocycles, Miscellaneous Reagents /// Application Notes: 4-Aminomethyl-2-methylpyridine is used in the synthesis of PDK1 used in multiple myeloma treatment and selective GSK-3 inhibitors for combatting Alzheimer's. /// References: Gentile, G. et al.: Bioorg.
