

Aquavan-d17

Art. ID TRC-A735447-25MG
Unit 25 mg

Description

Application Notes: Aquavan-d17 is the isotope labelled analog of Aquavan (A735445), a compound that is more commonly known as Fospropofol Disodium. It is a sedative/ hypnotic drug and a water-soluble prodrug of Propofol (P829750). Studies show that Fospropofol Disodium can have a protective effect on rat liver against ischemia-reperfusion injury. /// References: Campion, M.E., et al.: Drugs Today, 45, 567 (2009)| Liu, Y., et al.: Sichuan Daxue Xuebao, Yixueban, 42, 231 (2011)| Wang, H., et al.: Yiyao Daobao, 29, 1291 (2010)| Xie, L., et al.: Mazui Yu Jianhu Luntan, 17, 348 (2010)
