

O-[2-(Acetylamino)-2-deoxy-alpha-D-galactopyranosyl]-L-threonine

Art. ID TRC-A168525-250MG

Unit 250 mg

Description

Application Notes: O-[2-(Acetylamino)-2-deoxy-alpha-D-galactopyranosyl]-L-threonine is a reagent used in the preparation of Thomsen-nouveau (Tn) antigens and hydrazide derivatives for antitumor treatments. /// References: Shaik, A. et al.: Org.
