

2-Amino-5-(trifluoromethyl)-4-thiazolecarboxylic Acid

Art. ID TRC-A633310-250MG
Unit 250 mg

Description

Application Notes: 2-Amino-5-(trifluoromethyl)-4-thiazolecarboxylic Acid is a derivative of 2-Amino-4-thiazolecarboxylic Acid Ethyl Ester (E678465), a chemical reagent used in the preparation of SAR thiazolamino arylaminopyrimidines as anaplastic lymphoma kinase inhibitors. As well as in the synthesis of 4-bicyclic piperidine derivatives as potent stearoyl-CoA desaturase (SCD1) inhibitors in the treatment of cancer. // References: Liu, Z. et al.: Eur. J. Med.
