

5'-Azido-5'-deoxyguanosine

Art. ID TRC-A825045-50MG
Unit 50 mg

Description

Application Note: 5'-Azido-5'-deoxyguanosine is a reagent used in the synthesis of a series of non-hydrolysable 5'-aryl substituted GDP analogs which is an antileishmanial activity against Leishmania donovani axenic amastigotes and intramacrophage amastigotes stages.
