

2-Amino-5-bromo-3-hydroxybenzoic Acid

Art. ID TRC-A602187-50MG
Unit 50 mg

Description

Application Note: 2-Amino-5-bromo-3-hydroxybenzoic Acid is an intermediate used in the synthesis of 3-Hydroxyanthranilic Acid-d3 (H801792), which is the labeled analogue of 3-Hydroxyanthranilic Acid, one of the tryptophan metabolites along the kynurenine pathway. 3-Hydroxyanthranilic Acid has been shown to induce apoptosis in T cells.
