

cis-2-Amino-2-(2-chlorophenyl)-6-hydroxycyclohexanone Hydrochloride

Art. ID TRC-A602485-75MG

Unit 75 mg

Description

Application Notes: cis-2-Amino-2-(2-chlorophenyl)-6-hydroxycyclohexanone Hydrochloride is a metabolite of ketamine and increase AMPA receptor-mediated excitatory post-synaptic potentials in the CA 1 region of hippocampal slices. Anti-depressive effects.
