

Androstane-3alpha,17beta-diol 3-Glucuronide

Art. ID TRC-A637900-25MG
Unit 25 mg

Description

Application Notes: Androstane-3alpha,17beta-diol 3-Glucuronide is a derivative of Androsterone beta-D-Glucuronide (A637605), which is one of the major circulating C19-steroid metabolites in humans. Exaggerated Androsterone (A637535) metabolism is observed in hyper-androgenic as well as in some normo-androgenic women with acne and androsterone glucuronide could be a marker in differentiating acne and hirsutism in hyperandrogenic women. /// References: Thompson, D.L. et al.: Clin.
