

5-(3-Azidopropyl)-UTP ?4TEA

Art. ID TRC-A922800-50MG
Unit 50 mg

Description

Category: Aromatics, Carbohydrates and Derivatives, Nucleotides, Bases and Related Reagents /// Application Notes: 5-(3-Azidopropyl)-UTP ?4TEA is used in the synthetic preparation of enzymic incorporation of azide-modified UTP analog into oligoribonucleotides for post transcriptional chemistry functionalization. /// References: Rao, H., et al.: Nature Protocols, 7, 1097 (2012)
