Description

This Standard Reference Material (SRM®) is intended for use in preparing solutions for calibrating electrodes for pH measuring systems. SRM 185i Potassium Hydrogen Phthalate (KHC₈H₄O₄) was prepared to ensure high purity and uniformity. However, this SRM is certified ONLY as a pH standard [pH(S)] not as a pure substance. A unit of NIST-185i consists of 60 g of potassium hydrogen phthalate. /// Sample value(s) - please ask for current certificate.
