Description

This Standard Reference Material (SRM®) is intended primarily for validation of methods for determining proximates, sugars, dietary fiber, vitamins, elements, and amino acids in fortified breakfast cereals and similar materials. This SRM can also be used for quality assurance when assigning values to in-house reference materials. The SRM is a wheat-based fortified breakfast cereal prepared by a commercial manufacturer. A unit of NIST-3233 consists of one bottle containing approximately 60 g of material and sealed inside an aluminized pouch. /// Sample value(s) - please ask for current certificate.
