

Loamy sand soil 2 - Total Petroleum Hydrocarbons

Art. ID	LGC-QC3013
Unit	100 g
Deliverydetails	No Dangerous Good /not restricted

Description

The method used for the determination of TPH was based on the ISO 16703:2004(E) Standard Soil Quality-Determination of content of hydrocarbons in the range of C10 to C40 by gas chromatography. Indicative values

Text/Information	Analyte/Parameter	CAS number	Concentration/Value	Unit	Method	Source
Textural classification	Sand 2,00-0,063mm		87	%		
Textural classification	Silt 0,063-0,002mm		6	%		
Textural classification	Clay <0,002mm		7	%		
	Total Petroleum Hydrocarbons (C10-C40)		4100	mg/kg	ISO 16703 :2004
