

(+)-Abscisic Aldehyde

Art. ID TRC-A110005-1MG
Unit 1 mg
Deliverydetails No Dangerous Good

Description

Category: Agro-Products, Chiral Reagents /// Appearance: White to Pale Beige Solid /// Application Notes: Abscisic Aldehyde, is an intermediate in the biosynthesis of the plant hormone Abscisic Acid (A110000). It is also the biosynthetic precursor of phytohormone Abscisic Acid (ABA), which regulates stress responses and controls numerous aspects of plant growth and development. /// References: Sindhu, R.
