

N-Acetylthiourea

Art. ID TRC-A188850-1G
Unit 1 g
Deliverydetails UN2811 II E4

Description

Category: Amines, Pharmaceuticals, Intermediates and Fine Chemicals, Sulfur and Selenium Compounds ///
Appearance: solid /// Application Notes: N-Acetylthiourea is a derivative of Thiourea (T375450), a compound used in biochemistry to increase the solubility (and resolution) of membrane proteins in two-dimensional electrophoresis. N-Acetylthiourea can be used as a reducing agent in a two-part self curing endodontic sealing system. ///
