

Acrylamide-13C3

Art. ID TRC-A191303-1MG
Unit 1 mg
Deliverydetails No Dangerous Good UN2074 III E1

Description

Category: Aliphatics, Amines, Electrophoresis Materials, Isotope Labelled Compounds, MTS and Sulfhydryl Active Reagents /// Application Notes: Acrylamide-13C3 is carbon-13 labeled Acrylamide (A191300). Acrylamide is a chemical intermediate in production of polyacrylamides that are use in protein electrophoresis (PAGE), synthesis of dyes and copolymers for contact lenses. It is reasonably anticipated to be a human carcinogen (1,2).
