

4-Allyl-estrone Acetate

Art. ID TRC-A552605-5MG
Unit 5 mg
Deliverydetails No Dangerous Good

Description

Appearance: Off-White to Yellow Solid /// Application Notes: 4-Allyl-estrone Acetate is an intermediate in the synthesis of Estradiol 4-Carboxymethyl, which is a metabolite of 17beta-Estradiol (E888000). Estradiol is the major estrogen secreted by the premenopausal ovary. /// References: Bucala, R., et al.: J. Clin. Endocrinol.
