

N-Allylthiourea

Art. ID TRC-A572403-50G
Unit 50 g
Deliverydetails UN2811 III E1

Description

Application Notes: N-Allylthiourea is a reagent used in the synthesis of nano-composite materials and coatings used in the study of corrosion as well as in the preparation of carbon nanofiber-grafted highly porous polymeric beads for used as molecular filtration systems. /// References: Mishra, S. et al.: Chem.
