

4'-Aminoacetanilide

Art. ID TRC-A580010-5G
Unit 5 g
Deliverydetails No Dangerous Good /not restricted

Description

Application Notes: 4'-Aminoacetanilide is used in the preparation of several dyes including a new kind of monoazo-anthraquinone reactive dye. It is also used as a reagent in the synthesis of chrysin-benzothiazole conjugates which possess anticancer and antioxidant properties. /// References: Shan, B., et al.: Dyes Pigments, 123, 44 (2015)| Mistry, B., et al.: Bioorg.
