

6-Amino-1,3-dimethyluracil

Art. ID TRC-A607750-1G
Unit 1 g
Deliverydetails No Dangerous Good /not restricted

Description

Application Notes: 6-Amino-1,3-dimethyluracil is used as a reagent in the synthesis of new pyrimidine and caffeine derivatives that display highly potential antitumor activity. It is also used as a starting material in the synthesis of fused pyrido-pyrimidines. /// References: Abu-Hashem, A., et al.: Lett. Drug. Des. Discov., 12, 471 (2015)| Azev, Y., et al.: Mendelev Commun., 25, 310 (2015)
