

6-Amino-5-nitrosouracil-13C2

Art. ID TRC-A618512-2.5MG
Unit 2,5 mg
Deliverydetails No Dangerous Good

Description

Category: Nucleotides, Bases and Related Reagents, Isotope Labelled Compounds /// Application Notes: Isotope labelled 6-Amino-5-nitrosouracil is used in the preparation of palladium(II) complexes with 5-nitrosopyrimidines which display antiproliferative effects. Useful heterocyclic reagent in the synthesis of substituted purine derivatives displaying anti-thyroid activity. /// References: Illan-Cabeza, N. et al.: J. Inorg.
