

2-(4-Aminophenyl)-1,2-dihydro-1-oxo-7-(2-pyridinylmethoxy)-4-(3,4,5-trimethoxyphenyl)-3-isoquinolinecarboxylic Acid Methyl Ester Dihydrochloride

Art. ID TRC-A622635-10MG

Unit 10 mg

Deliverydetails No Dangerous Good

Description

Category: Aromatics, Enzyme substrates, Heterocycles, Inhibitors // Application Notes:

2-(4-Aminophenyl)-1,2-dihydro-1-oxo-7-(2-pyridinylmethoxy)-4-(3,4,5-trimethoxyphenyl)-3-isoquinolinecarboxylic Acid Dihydrochloride, is a selective substrate for cytochrome P450 3A5 (CYP3A5). These compounds are also 4-Aryl-1-isoquinolinone Derivatives, which are shown to be novel, potent, and selective Phosphodiesterase 5 (PDE5) Inhibitors. // References: Song, X., et al.: Bio. Med. Chem. Lett., 22, 1611(2012)| Tatsuzo, U., et al.: J. Med. Chem., 44, 2204 (2001)|
