

Aminomalononitrile p-Toluenesulfonate

| | |
|-----------------|-----------------------------------|
| Art. ID | TRC-A628060-1G |
| Unit | 1 g |
| Deliverydetails | No Dangerous Good /not restricted |

Description

Application Notes: Aminomalononitrile p-toluenesulfonate is a reagent for diazonamide synthesis via heck endocyclization. It may also have implications for developing I?B Kinase-beta inhibitors. /// References: Jeong, S., et al.: J. Org. Chem 63, 8640 (1998)| Morwick, T. et al.: J. Med. Chem. 49, 2898
