

5-[(2R)-2-Aminopropyl]-2-methoxybenzenesulfonamide

Art. ID	TRC-A628695-1G
Unit	1 g
Deliverydetails	No Dangerous Good /not restricted

Description

Category: Aromatics, Chiral Reagents, Drug Analogues, Intermediates /// Appearance: White Solid /// Application Notes: Precursor in the synthesis of Tamsulosin (T006350) and other alpha-androgenic antagonists.

(R)-Tamsulosin is a specific alpha1-adrenoceptor antagonist. It is used in the treatment of benign prostatic hypertrophy. /// References: Kawabe, K., et al.: J. Urol., 144, 908 (1990), Abrams, P., et al.: Br. J. Urol., 76, 325 (1995), Michel, M.C., Expert Opin. Pharmacother., 5, 151 (2004)
