

### **3-Allyl Salicylaldehyde**

Art. ID TRC-A575000-1G  
Unit 1 g  
Deliverydetails No Dangerous Good /not restricted

#### **Description**

Category: Aromatics, Intermediate, Miscellaneous Reagents /// Appearance: Light Yellow to Yellow Oil ///

Application Notes: 3-Allyl Salicylaldehyde is a synthetic intermediate for the sythesis of 3-aminoflavones. Flavonoids have been studied for their antiproliferative activity and in vitro cytotoxicity. Used in the preparation of oxazole derivatives. Used in the preparation of imidazole scaffold-based 2-substituted benzofurans for application against human tumor cell lines. Also a reagent in the synthesis of antioxidant and antimicrobial novel chalcones. ///
