

Ammonium 7-Fluoro-2,1,3-benzoxadiazole-4-sulfonate

Art. ID TRC-A634000-1MG
 Unit 1 mg
 Deliverydetails No Dangerous Good /not restricted

Description

Category: Fluorescent Labels and Indicators, MTS and Sulfhydryl Active Reagents // Appearance: Yellow Solid // Application Notes: A water soluble bifunctional fluorogenic reagent for the sensitive and specific detection of thiols in biological specimens or proteins. SBD-F has high reactivity to thiol compounds to attain low detection limits, no fluorescence in itself, biological buffer solubility, stability at RT in water for >1 week. The optimal condition for reaction was 60°C and pH 9.5 for 1 h. Please refer to the following references for more specific information regarding the application of SBD-F as a fluorogenic reagent for detection of cysteine containing peptides. Fluorescence: max Abs. I = 380 nm, max Em. I = 515 nm, Molar Abs. > 4x103 (ca. 317nm) // References: Imai, K., et al.: Anal. Biochem., 128, 471 (1983) | Sueyoshi, T., et al.: J.
