

Ammonium Iron(II) Sulfate Hexahydrate (Mohr's Salt)

Art. ID TRC-A634045-50G
Unit 50 g
Deliverydetails No Dangerous Good /not restricted

Description

Application Notes: Ammonium Iron(II) Sulfate Hexahydrate (Mohr's Salt) is used in analytical chemistry allowing products to resist oxidation. In addition it is used in the measurement of high doses of gamma rays. /// References: Hickman, C. et al.: Rad. Prot. Dent., 17, 255 (1986)
