

Aniline Blue Diammonium Salt

Art. ID TRC-A662503-25G
Unit 25 g
Deliverydetails No Dangerous Good /not restricted

Description

Application Notes: Aniline Blue diammonium salt is used in Mallory's connective tissue stain and Gomori's one-step trichrome. It can also be used as analytical reagent use and study for new colorimetric method to quantify beta-1,3-1,6-glucans in comparison with total beta-1,3-glucans in edible mushrooms. /// References: Nitschke, J.: Food Chem, 127, 791 (2011)| Penney, D.P., et al. 2002.
