

2-(3R)-1-Azabicyclo[2.2.2]oct-3-yl-2,4,5,6-tetrahydro-1H-benz[de]isoquinolin-1-one Hydrochloride

Art. ID TRC-A795310-5MG
Unit 5 mg
Deliverydetails No Dangerous Good

Description

Category: Chiral Reagents, Heterocycles, Pharmaceuticals, Intermediates and Fine Chemicals /// Appearance: Off-White to Pale Yellow Solid /// Application Notes:

2-(3R)-1-Azabicyclo[2.2.2]oct-3-yl-2,4,5,6-tetrahydro-1H-benz[de]isoquinolin-1-one Hydrochloride is an intermediate in the synthesis of Palonosteron (P165805), an serotonin 5-HT₃ receptor antagonist used in the prevention and treatment of chemotherapy-induced nausea and vomiting. /// References: Costall, B., et al.: Euro. J. Pharmacol., 234, 91 (1993)
